

East Anglia ONE

21 December 2023

Landscaping maintenance

East Anglia ONE offshore windfarm became operational in 2020. As part of the planning consent for the scheme, ScottishPower is committed to maintaining new vegetation which was planted as part of the reinstatement works. New planting needs to be maintained for five years post construction.

A temporary compound will be installed from early January to mid-February 2024 near the Top Street roundabout in Martlesham. It will be used to keep a stores container and welfare facility and accommodate intermittent parking.

The maintenance work will take place along the 37km onshore cable corridor and is due to finish in February 2024.
